

CSS 3 Assignments

Assignment 1: Create a Navigation Bar

Create a navigation bar using CSS. The navigation bar should have a background color, text color, and padding. It should contain at least five links, and each link should have a different hover effect. Use CSS to style the navigation bar and make it visually appealing.

Assignment 2: Design a Responsive Layout

Design a responsive layout using CSS. The layout should include a header, a main content area, and a footer. The header should have a fixed height, while the main content area should take up the remaining space. When viewed on smaller screens, the layout should stack vertically and adjust its width accordingly. Use CSS media queries to make the layout responsive.

Assignment 3: Create a Pricing Table

Create a pricing table using CSS. The table should have multiple columns, each representing a different pricing plan. Style the table to make it visually appealing, including different background colors, text colors, and font styles for the table headers and pricing cells. Add hover effects to the table rows to make them stand out when the user hovers over them.

These assignments will help you practice different aspects of CSS, such as styling elements, creating responsive layouts, and designing tables. Feel free to get creative and add additional features or styling to each assignment. Good luck!
